

March 2003

From the Desk of J. Brandt DC, FACO
President, Academy of Chiropractic Orthopedists

Good Morning Doctor:

I am pleased to tell you that our redesigned web site is now up and running. The content will be changing from time to time. We have a new feature on this site; it is the beginning of "Web Cases." We will have from time to time cases sent in by Fellows; these cases will be posted here.

For each case accepted, 2 hours of credit can be used toward Academy voluntary recertification! The cases are reviewed by at least two Fellows who are non-Board members. You may be asked to explain something a little more or other easy changes to clear something up. Our first case presenter was grateful for the suggestions. It's an interesting case.

Visit the site at <http://www.dorthoacademy.com> and bookmark it as changes and links will be added from time to time.

Our annual Board meeting is next month, after the meeting there will be more information that can be given to you regarding the Board's future plans.

I recently visited the new FCER facilities in Norwalk, IA, for Academy business. It is a great facility, efficient, modern and an asset to chiropractic.

I am looking forward to seeing many of you at the ACCO conference in Sonoma, California next month. I would be pleased if you would stop and talk to me about the Academy and how we can be of greater benefit to you!
